

# If I lived in a village

Imagine... if you lived in a village like this

What would your home look like on the inside?  
Name at least three things that your Canadian home has that the homes in this village don't.

- 1)
- 2)
- 3)

Think about the things that you use everyday that take electricity. What are some of them?

Think about the water you use and where it comes from. Where would these children get water?

Think about the furniture you have in your home. Do these children have beds to sleep in or other furniture to relax in?

How is food stored and cooked in these homes?

Do the children in this picture look sad or happy?

On the back of this sheet, write a story about what your life would be like if you lived here.
